

CSI Interior Floor Strip

Technical Data Sheet 43.0910DS

Description

CSI Interior Floor Strip is a concentrated stripper that quickly and effectively strips CSI Floor Finish WB (gloss or satin) without harming or removing the base sealer.

Product Benefits

- Used according to directions, CSI Interior Floor Strip is safe to use on any surface that has been “top coated” with CSI Floor Finish WB (gloss or satin).

Pre-Application

1. Dilution Ratios – To remove CSI Floor Finish WB (gloss or satin), dilute CSI Interior Floor Strip with 6-10 parts water. Dilution can range from 1:6 to 1:10, depending on amount of sealer being removed.
2. Before applying, test CSI Interior Floor Strip in an inconspicuous area to ensure compatibility. For any questions regarding compatibility with existing surface, contact ChemSystems, Inc.

Application to Concrete

1. Apply with sprayer or mop.
2. For 5-10 minutes, allow solution of stripper and water to dissolve and to “raise” the old sealer. Allow CSI Interior Floor Strip to do the initial work.
3. In many cases, light or medium scrub pads or brushes may be used. CSI Interior Floor Strip works with low foaming and easy rinsing.
4. After scrubbing, absorb excess stripper solution and stripped sealer. Rinse surface and dry completely.

Limitations and Precautions

- CSI Interior Floor Strip is intended to remove only CSI Floor Finish WB (gloss or satin), a polymer surface finish. This stripper should not be used to strip other CSI sealers.
- CSI Interior Floor Strip is not intended for use as a general purpose cleaner.

Shelf Life and Storage

CSI Interior Floor Strip has a shelf life of one year. Store indoors, away from heat and direct sunlight. Do not allow to freeze.

Coverage Rate and Drying Times

Coverage rates may vary depending on surface porosity, texture, age and condition of the concrete, the application method, and other local conditions.

- Material usage is approximately 1,000 square feet per gallon.

Package Sizes

CSI Interior Floor Strip is available in 1- and 5-gallon units.

Applicable Standards

CSI Interior Floor Strip complies with ASTM D3209-82 for freeze/thaw stability for a minimum of three cycles.

Technical Data

Please refer to the corresponding MSDS for hazard-related information.

Color/Odor	Clear, yellow/Citrus
Detergent Type	Nonionic
Solubility in Water	100% for hard, soft and/or deionized water
pH.....	13.8 + 0.2 for concentrate 12.9 + 0.2 for 1:10 dilution
Surface Tension.....	29 dynes per centimeter
Specific Gravity	1.03 (H ₂ O=1)
Density	8.6 pounds per gallon
Flash Point	None

Product Handling

For complete instructions on handling and use, consult the corresponding Material Safety Data Sheet before using product.

Warranty

CSI Interior Floor Strip, a proprietary product, is warranted to be of uniform quality within manufacturing tolerances. Since control is not exercised over its use, no warranty, expressed or implied, is made as to the effects of such use. Seller's and manufacturer's obligation under this warranty shall be limited to refunding the purchase price of that portion of the material proven to be defective. The user assumes all other risks and liabilities resulting from use of this product. If you have any questions, please contact ChemSystems, Inc.
